TypeScript, JavaScript, React, Next.js, Node.js, Python, FastAPI, Rust

PLATFORM & TOOLING

Directus, Docker, AWS, GCP, Google AdSense, Pulumi, Flightcontrol, CI/CD, GitHub

UI & DX

Shadcn UI, accessibility, animation, CLI tooling, developer experience

01 SUMMARY

Senior full stack engineer with about six going on seven years of coding experience (since end of 2019) and professional work since 2021. Feature owner for AI products, solo CMS lead with cross-team revenue impact, and author of a compile-first frontend framework (React, Next.js, TypeScript, Python/FastAPI). Owns architecture, mentoring, and delivery.

02 EXPERIENCE

Center for Opportunity and Wealth Data

AUG 2026 — PRESENT

Full Stack Engineer CONTRACT · REMOTE

- Feature owner for the AI initiative and chatbot; build across React, Next.js, TypeScript, Python/FastAPI, and modern APIs.
- Seniors defer to me on infrastructure soundness calls; help seniors and juniors understand the code and output I produce, and run training sessions for the team.
- Plan cross-team functionality across marketing, design, and ops.

Zenith Build

JUL 2025 — AUG 2026

Lead Architect & Author SELF-EMPLOYED · HOUSTON, TX · REMOTE

- Lead architecture and development of Zenith, a Rust-powered, compile-first frontend framework (compiler, routing, reactivity, CLI tooling, docs, DX).
- Lead Zenith Guard, an auditable CI trust system (evidence, contracts, baselines, persistence, replay).
- Delivered 870+ commits, 8 repos merged into 1, and 25 releases across framework and tooling.

Hope Media Group

JUN 2024 — JUN 2025

Software Engineer FULL-TIME · HOUSTON, TX · HYBRID

- Solo engineer on the CMS team; led product-side work and trained teammates while owning Directus, React, Next.js, Node.js, and TypeScript delivery.
- Worked cross-team with marketing and editorial; established GCP and Google AdSense, driving a $36,000 monthly revenue increase across brands.
- Dockerize and deploy apps on AWS via Flightcontrol; infrastructure-as-code CI/CD with Pulumi across dev, staging, and production.
- Maintain multiple Directus CMS environments; ship accessible, design-forward UI improvements.

Narrowstack

JAN 2024 — JUN 2024

Full Stack Engineer CONTRACT · NEW ORLEANS, LA · REMOTE

- CMS team: full-stack React, Next.js, Node.js, Directus, and Shadcn UI.
- Frontend UI/UX, performance, and visual improvements; backend and frontend troubleshooting.

Freelance

JUL 2021 — JAN 2024

Full-stack Developer REMOTE · NEW ORLEANS, LA

- Built React, Next.js, Node.js apps and Jamstack sites from scratch for clients.
- Animations and interactive features with modern JavaScript and React animation libraries.
